

Job Recruitment Portal — Software Requirements Specification (SRS)

Version: 1.0 (Baseline before CR-001)

Status: Approved for planning

1. Purpose

This SRS defines functional and non-functional requirements for the JRP MVP. Requirement IDs are stable identifiers used in the RTM, design, backlog, tests, and change control.

2. Actors

- ****Candidate:**** Maintains profile, searches jobs, submits applications, tracks status.
- ****Recruiter:**** Manages jobs and applicant processing.
- ****Administrator:**** Manages users, roles, and audit access.

3. Functional Requirements

ID	Requirement	Priority
FR-CAN-001	The system shall allow a candidate to register using name, email and password.	Must
FR-CAN-002	The system shall authenticate registered candidates.	Must
FR-CAN-003	The system shall allow a candidate to create and update a profile including contact details, skills and resume metadata.	Must
FR-CAN-004	The system shall allow a candidate to search and filter active jobs by keyword and location.	Must
FR-CAN-005	The system shall display job details including title, description, location and closing date.	Must
FR-CAN-006	The system shall allow an authenticated candidate to submit one application per active job posting.	Must
FR-CAN-007	The system shall allow a candidate to view submitted applications and current application status.	Must
FR-REC-001	The system shall allow an authorized recruiter to create a job posting.	Must
FR-REC-002	The system shall allow a recruiter to edit, publish, close, and view owned job postings.	Must
FR-REC-003	The system shall allow a recruiter to	Must

	view applicants for owned job postings.	
FR-REC-004	The system shall allow a recruiter to view candidate application/profile details needed for review.	Must
FR-REC-005	The system shall allow a recruiter to update application status.	Must
FR-ADM-001	The system shall allow an administrator to activate/deactivate user accounts.	Should
FR-ADM-002	The system shall allow an administrator to assign supported roles.	Should
FR-ADM-003	The system shall allow an administrator to view audit events.	Should

4. Business Rules

ID	Rule
BR-001	Email address must be unique per account.
BR-002	A candidate may submit only one application per job.
BR-003	Applications may be submitted only while a job is Published and before its closing date.
BR-004	Recruiters may manage only jobs they own unless granted elevated permission.
BR-005	Supported application statuses are Submitted, Under Review, Interview, Rejected, Hired.

5. Non-Functional Requirements

ID	Category	Requirement / Measure
NFR-001	Security	Passwords shall be stored using a modern salted one-way hash; authorization shall be enforced server-side.
NFR-002	Performance	95% of normal page/API responses shall complete within 2 seconds under the agreed MVP test load.
NFR-003	Availability	Target monthly availability is 99.5% excluding planned maintenance.
NFR-004	Usability	Core candidate application flow shall be completable without training using labeled controls and validation messages.
NFR-005	Auditability	Login administration and application-status changes shall record actor, timestamp and action.
NFR-006	Privacy	Candidate data shall be visible only to authorized users with a business need.
NFR-007	Accessibility	Core screens shall target WCAG 2.1 AA practices for keyboard use, labels and contrast.
NFR-008	Recovery	Daily database backup shall be

		retained for at least 7 days in the MVP environment.
--	--	--

6. Acceptance Examples

FR-CAN-006: Given an authenticated candidate and a published job with no prior application, when the candidate confirms Apply, then an application is created with status Submitted and appears in My Applications.

FR-REC-005: Given an authorized recruiter viewing an applicant, when the recruiter changes status to Under Review, then the new status is saved and visible to the candidate.

7. Traceability

See `JRP-RTM.xlsx`. CR-001 proposes a new requirement, FR-CAN-008, after formal approval.
